Office Action Summary	Application No. 09/853,465	Applicant(s) STRONGIN, GEOFFREY S.	
	Examiner Ellen C Tran	Art Unit 2134	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 May 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-103 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-103 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Detailed Action

1. This action is responsive to communication: original application filed 11 May 2001, with acknowledgement of continuing file date of 10 May 2001.
2. Claims 1-103 are currently pending claims 1, 32, 39, 51, 55, 64, 66, and 97 are independent claims.
3. The related application data in the specification needs to be updated.

Claim Objections

4. Claims 16, 24, 31, 81, are objected to because of the following informalities: because they do not end with a period ".". Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1, 39, 51, 55, 66, and their subsequent dependent claims 2-31, 40-50, 52-54, 56-61, and 67-77 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The independent claims contain the following text "retrieving at least a portion of the data stored in the first location using the secret" does not make sense since according to previous lines in claim reading a secret from a first location; and securing the secret was secured in a location different from the first location. Examiner assumes the line should be interpreted "retrieving at least a portion of the data stored in the location different from the first location using the secret".

Art Unit: 2134

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-103 rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,442,704 by Holtey (hereinafter '704) issued August 15, 1995.

As to independent claim 32, “A method of securing data in a personal computer system, the method comprising:” is taught in '704 col. 5, lines 39-51;

“storing a secret within a first location” is shown in '704 col. 10, lines 44-54;

“and storing code different from the secret within the first location” is disclosed in col. 8, lines 46-59;

“wherein the code is configured to provide access to data stored in the first location when processed in association with the secret” is taught in '704 col. 12, lines 28-47.

As to dependent claim 33, this claim contains substantially similar subject matter as claim 32 and is rejected along similar rationale.

As to dependent claim 34, “wherein the memory is a read-only memory (ROM); wherein storing a secret within the memory comprises storing a secret within the ROM; and wherein storing code different from the secret within the memory comprises storing code different within secret within the ROM; and wherein the code is configured to provide access to data stored in the ROM when processed in association with the secret” is shown in '704 col. 5, lines 39-51.

Art Unit: 2134

As to dependent claim 35, “wherein the data comprises basic input-output system (BIOS) data and the ROM is a BIOS ROM: configured to store the BIOS data; wherein storing a secret within the ROM comprises storing a secret within the BIOS ROM; wherein storing code different within secret within the ROM comprises storing code different within secret within the BIOS ROM; and wherein the code is configured to provide access to BIOS data stored in the BIOS ROM when processed in association with the secret” is disclosed in ‘704 col. 5, lines 52-64.

As to dependent claim 36, “wherein storing a secret within the memory comprises storing the secret inside the data within the memory” is taught in ‘704 col. 6, lines 45-59.

As to dependent claim 37, “wherein storing a secret within the memory and storing code different from the secret within the memory comprises storing the secret inside the code within the memory” is taught in ‘704 col. 6, lines 45-67.

As to dependent claim 38, further comprising: providing a lock bit associated with the data stored in the memory that when set provides an indication that the data stored in the memory is secured” is shown in ‘704 col. 3, lines 7-14.

As to independent claim 55, “A method of securely accessing data in a personal computer” is disclosed in ‘704 col. 5, lines 39-51;

“the method comprising: step for reading a secret from a first location” is taught in ‘704 col. 9, lines 7-24;

“step for securing the secret in a secure location different from the first location” is shown in ‘704 col. 11, line 58 through col. 12, line 19;

Art Unit: 2134

“and step for retrieving at least a portion of the data stored in the first location using the secret” is disclosed in ‘704 col. 12, lines 28-47.

As to dependent claim 56, **“further comprising: step for reading code from the first location”** is taught in ‘704 col. 9, lines 7-24;

“wherein the code is different from the secret and different from the data stored in the first location” is shown in ‘704 col. 8, lines 46-59;

“wherein the step for retrieving at least the portion of the data stored in the first location using the secret comprises step for retrieving at least the portion of the data stored in the first location using the code and the secret” is disclosed in ‘704 col. 12, lines 28-47.

As to dependent claim 57, **“further comprising: step for unlocking a lock bit associated with the data stored in the first location prior to the step for retrieving at least the portion of the data stored in the first location using the secret”** is taught in ‘704 col. 3, lines 7-14.

As to dependent claim 58, **“further comprising: step for processing the secret using the code; wherein the step for unlocking the lock bit associated with the data stored in the first location comprises step for unlocking the lock bit associated with the data stored in the first location in response to the step for processing the secret using the code”** is shown in ‘704 col. 11, lines 45-67.

As to dependent claim 59, **“further comprising: step for storing the secret within the first location securely”** is disclosed in ‘704 col. 10, lines 44-54;

Art Unit: 2134

“step for storing data within the first location securely; and step for storing code different from the secret and different from the data within the first location securely” is taught in ‘704 col. 8, lines 46-59.

As to dependent claim 60, “further comprising: step for unlocking a lock bit associated with the data prior to the step for retrieving at least the portion of the data from the first location using the secret” is shown in ‘704 col. 3, lines 7-14.

As to dependent claim 61 and 62, these claims contain substantially similar subject matter as claim 55 and are rejected along the same rationale.

As to dependent claim 63, “further comprising: step for providing a lock bit associated with the data that when set provides an indication that the data stored in the first location is secured” is disclosed in ‘704 col. 3, lines 7-14.

As to independent claim 1, this claim contains substantially similar subject matter as claim 55 and is rejected along the same rationale.

As to dependent claim 15, this claim contains substantially similar subject matter as claim 59 and is rejected along the same rationale.

As to dependent claim 2, 16, 26, and 27, these claims contain substantially similar subject matter as claim 55 and are rejected along the same rationale.

As to dependent claim 17, “wherein the memory is a read-only memory (ROM); wherein storing a secret within the memory comprises storing a secret within the ROM; wherein storing data within the memory comprises storing data within the ROM; wherein storing code different from the secret and different from the data within the memory comprises storing code different within secret and different from the data within the

Art Unit: 2134

ROM; wherein securing the secret in a secure location different from the memory comprises securing the secret in a secure location different from the ROM; and wherein retrieving at least a portion of the data from the memory using the secret comprises retrieving at least a portion of the data from the ROM using the secret” is taught in ‘704 col. 5, lines 39-51.

As to dependent claim 18, “wherein the data comprises basic input-output system (BIOS) data and the ROM is a BIOS ROM configured to store the BIOS data; wherein storing a secret within the ROM comprises storing a secret within the BIOS ROM; wherein storing data within the ROM comprises storing data within the BIOS ROM; wherein storing code different within secret and different from the data within the ROM comprises storing code different within secret and different from the BIOS data within the BIOS ROM; wherein securing the secret in a secure location different from the ROM comprises securing the secret in a secure location different from the BIOS ROM; and wherein retrieving at least a portion of the data from the ROM using the secret comprises retrieving at least a portion of the BIOS data from the BIOS ROM using the secret” is shown in ‘704 col. 5, lines 52-64.

As to dependent claim 19, “wherein storing a secret within the memory and storing data within the memory comprises storing the secret inside the data within the memory” is disclosed in ‘704 col. 6, lines 45-59.

As to dependent claim 20, “wherein storing a secret within the memory and storing code different from the secret and different from the data within the memory comprises storing the secret inside the code within the memory” is taught in ‘704 col. 6, lines 45-67.

Art Unit: 2134

As to dependent claims 21 and 22, these claims are substantially similar to claims 56 and 57; therefore they are rejected along the same rationale.

As to dependent claim 23, “wherein reading the secret from the memory comprises reading the secret from the memory during a boot sequence; and wherein securing the secret in a secure location different from the memory comprises storing the secret in SMM memory space” is shown in ‘704 col. 10, lines 44-53.

As to dependent claim 24, “wherein retrieving at least a portion of the data from the memory using the code and the secret further comprises: processing the code; and transmitting at least an indication of the secret to the memory” is disclosed in ‘704 col. 11, lines 45-67.

As to dependent claim 25, “wherein retrieving at least a portion of the data from the memory using the code and the secret further comprises: receiving a challenge from the memory; and transmitting a response to the memory including at least an indication of the secret to the memory, in response to receiving the challenge” is shown in ‘704 col. 6, 36-67.

As to dependent claim 3-14, these claims contain substantially similar subject matter as claims 17, 18, 19, 56, 61, 19, 57, and 58; therefore they are rejected along the same rationale.

As to dependent claim 28-31, these claims contain substantially similar subject matter as claims 23, 56, and 57; therefore they are rejected along the same rationale.

As to independent claim 39, this claim is directed to a computer system of the method of claim 55 therefore it is rejected along the same rationale.

As to dependent claims 40-49, these claims contain substantially similar subject matter as claims 17-20 and 55-63; therefore they are rejected along the same rationale.

Art Unit: 2134

As to dependent claim 50, “wherein the master device includes a microprocessor” is taught in ‘704 col. 3, lines 27-34.

As to independent claim 51, this claim is directed to a computer system of the method of claim 55 therefore it is rejected along the same rationale.

As to dependent claims 52-54, these claims contain substantially similar subject matter as claims 17-20 and 55-63; therefore they are rejected along the same rationale.

As to independent claim 64, this claim is directed to a computer system of the method of claim 32 therefore it is rejected along the same rationale.

As to dependent claims 65, this claim contains substantially similar subject matter as claim 38; therefore it is rejected along the same rationale.

As to independent claim 66, this claim is directed to a computer readable program of the method of claim 55 therefore it is rejected along the same rationale.

As to dependent claims 67-90, these claims contain substantially similar subject matter as claims 17-20 and 55-63; therefore they are rejected along the same rationale.

As to independent claim 97, this claim is directed to a computer readable program of the method of claim 32 therefore it is rejected along the same rationale.

As to dependent claims 98-103, these claims contain substantially similar subject matter as claims 33-38; therefore they are rejected along the same rationale.

Art Unit: 2134

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

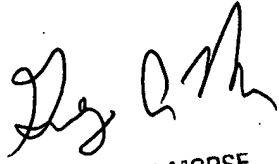

Mathis	U.S. Patent Application Publication No. 2001/0037438	
Kai	U.S. Patent 6,230,244	issued May 2001
Takata	U.S. Patent 6,469,928	issued Oct. 2002
Phillips et al.	U.S. Patent 6,505,279	issued Jan. 2003

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ellen C Tran whose telephone number is (571) 272-3842. The examiner can normally be reached from 6:30 am to 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory A Morse can be reached on (571) 272-3838. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
